

# *Protecting Fair Elections with Lori Grace*

Fascinating stories and critically important information on U.S. elections not reported in corporate media. With upcoming high stakes elections for Hawaii's Governor and U.S. Senators, how do we insure accuracy in our elections? Protecting fair elections has always been part of the ongoing struggle to preserve our Democracy. Flaws in electronic tabulating and vote transmittal pose new threats to fair elections that remain unacknowledged by media or government. Since 2003, Lori Grace has worked closely with whistleblowers and behind the scenes informants, Congressional leaders, candidates, state government officials and election reform advocates. Lori played a significant role in both the attempted recounts of the 2004 presidential election and in protecting the success of the 2008 presidential election.
