

# DEPLETED URANIUM: PANEL DISCUSSION

Depleted Uranium (DU) munitions in Iraq threaten the health of our soldiers and the Iraqi people. DU rounds have also been found in Hawaii. How bad, and where, is the DU in Hawaii? Must our returning veterans get tested for DU exposure in Iraq?

The public, and especially veterans and military families are invited to hear our panel discuss this and answer your questions at 7pm in MCC Ka Lama 103.

Panelists include **Dr. Lorrin Pang**, Maui Dept. of Health Officer; **Sol Kaho'ohalahala**, Executive Director of the Kaho'olawe Island Reserve Commission, and **Karen Chun**, energy engineer and DU researcher.

Inform yourself about the dangers of Depleted Uranium at this public meeting.

**Friday February 24th**

**Maui Community College**

**Ka Lama Building Room 103**

**7:00 pm--Public Welcome**
